DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Satoshi et al (JP 10-248958) in view of Yamagishi et al (5,601,503). Regarding claim 1, Satoshi discloses a golf ball comprising a core and a cover. The hardness of the cover layer between 58 and 72 is an obvious feature since Satoshi discloses identical ionomers for the cover materials, Himilan 1557, 1605, 1652, 1705, 1706, 1707, 18855, 1856 and Iotek 7010, 8000. Regarding claim 2, the core has a deformation from 2.5 to 4.5 mm with an initial load of 10 kgf and a final load of 130 kgf. Regarding claims 3 and 4, the core layer comprises a 100 parts of a polybutadiene rubber, 15-45 parts by weight of zinc acrylate, 0.2 to 5 parts by weight of an organic peroxide, and 0.05 to 3 parts by weight of an organic disulfide compound. Satoshi discloses dimples on the golf ball but does not disclose at least 50% of the dimple having a contour length greater than 11.6. Applicant defines the contour length (x) as the diameter of the dimple (D) multiplied by π . Solving for D gives a diameter of at least 3.5 mm to provide a contour length of at least 11.6 mm. Yamagishi discloses a golf ball with all dimple diameters from 2.5 to 4.4 mm. Regarding claims 1, 5 and 6, the golf ball compression, initial

velocity, and total distance of the golf all are obvious features of Satoshi in view Yamagishi since the material make up is the same for each layer as shown by Satoshi and the dimple dimensions are shown by Yamagishi. One skilled in the art would have modified Satoshi in view of Yamagishi to achieve the desired flight characteristics.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raeann Gorden whose telephone number is 703-308-8354. The examiner can normally be reached on 7:30 AM to 5:00 PM Mon-Fri.
